## **Screen Goo Asia signs Exclusive Philippine Distribution Agreement with ATI**

**Las Vegas, Nevada, USA, January 4, 2009** – Goo Systems, Screen Goo Asia and American Technologies Incorporated (ATI) are pleased to announce the signing of an Exclusive Distribution Agreement which will make all Screen Goo products available in the Philippines through ATI.

“We are pleased to sign this agreement with ATI” said Chris Cladis, Screen Goo Asia General Manager. “Ideas flowed everywhere when we sat down to talk with them about Screen Goo and the potential applications in specialized as well as standard AV markets. In addition to the standard Home Theater applications that Screen Goo is well known for, ATI is already building special application image projection systems for the Architectural, Product Design, Digital Signage as well as new Digital Movie Theater applications amongst many others. It is this type of companies and people “who get it” that Screen Goo is very happy to associate ourselves with”.

When asked to comment, Boy Co, President of ATI said “We are also happy to handle Screen Goo products in the Philippines. There is not much one cannot do imaging/projection-wise with this product. We are a company of ideas and of utilizing technology for any practical application imaginable within or outside the scope of AV and Screen Goo makes all this possible”.

Screen Goo is a specially formatted, highly reflective acrylic paint, designed specifically for the Video Projection industry. Screen Goo acrylic paint transforms any smooth paintable surface into a high performance projection screen.
