

PRESS RELEASE

Integrated Systems Europe 2008 Widescreen and a Wide Range from Optoma

FOR IMMEDIATE RELEASE

PR00075

Optoma Europe Ltd., (January, 2008) – Optoma, one of the leading manufacturers of digital projection and display devices, extends its invitation to trade visitors to review the EP783 and other new releases at Integrated Systems Europe (ISE) exhibition 2008, Amsterdam from January 29th – 31st 2008.

Showcasing new releases from Optoma's extensive range of Pro A/V projectors ISE promises to be an enthralling event. Live demos of the EP783, EP763 and EP782 will be supported at **Optoma booth C136**.

Among these the EP783 Native XGA with an exceptionally bright 5000 lumens and remote controlled variable lens shift – plus lens options – is the flagship product to dominate conference halls, museums or any large-screen venues on its release. The magnitude of this install projector confirms it as this year's ISE must-see although the combination of two 3500 lumen EP763 projectors performing a new blending technique on a super-wide, multi-format screen is a show of technological excellence.

For the leisure and A/V market Optoma will present its first projector with networking and control capabilities. The ultra-bright 4600 lumen EP782 has wireless capabilities – a good choice for large venues and conference rooms minimising extensive cabling. A rich set of connections, two 3 watt speakers plus audio connectivity are seamlessly incorporated into its stylish design.

The widescreen and HD ready EP1691 (one of many high-quality data products such as the EP721 and EP729 on the Optoma stand) offers amazing brightness yet its compact dimensions are the ideal solution for the travelling businessman.

The VTE-D and VXE-D are the latest updates to DLP™ optical engines on display. The robust design dual light optical engines has a combined strength of 1300 lumen brightness or the advantage of 650 lumen single operation with back-up.

For a hands-on approach and enquiries on spectacular business and educational offerings, industry leaders, buyers and executives are all welcome to meet Optoma and discuss the options available.

About Optoma

Optoma is a world leading designer and manufacturer of award-winning projectors for Business, Education, Professional Audio/Video and Home Entertainment, with comprehensive ranges to exceed the expectations of every user.

Optoma's innovative products are carefully crafted to deliver crystal clear images of unrivalled quality by incorporating the latest DLP® technology from Texas Instruments', together with advanced optical engineering expertise and dedication to superb product quality,

Optoma has a special approach to customer service. Full product and technical support are available through our extensive network of resellers and distributors. Where Optoma is different is that projector users can call us directly to discuss any concerns.

The Optoma Group has continental headquarters in Europe, the USA and Asia; whilst Optoma Europe Ltd, based in London, covers Europe, Middle East and Africa (EMEA), delivering local services from regional offices in Germany, France and Norway.
